Re: Solvents Recovery Service of N.J.
Linden, New Jersey

Dear Sir:

The Hazardous Waste Site Investigation Program of the U.S. Environmental Protection Agency (EPA) is currently involved in the investigation of hazardous waste sites. The Task Force is responsible for monitoring and maintaining current status of all hazardous waste sites in Region II.

One such site is the Solvents Recovery Service of New Jersey, located at 1200 Sylvan Street in Linden, New Jersey. Our Surveillance and Analysis Division visited the Solvents Recovery property on December 14, 1979. While no immediate environmental hazard was found at the facility, there may be occupational hazards for personnel involved in routine operations on the plant property. To complete our file, please provide us with a recent inspection report or other information you may have on this operation and send to my attention in Room 812 at the above address.

Your cooperation is very much appreciated.

Sincerely yours,

Richard Ramon
Sanitary Engineer
